4 Countries
3 States &
35 Cities in
India

MOBILE APPLICATIONS

Happy Hero is a very prestigious task we have done as we have developed it directly for HERO MOTO CORP.

Service is a most important factor for any automobile dealer as automobile company. Once customer get delivery customer care executive of that workshop will get feedback through this app. There are various questions and related to that user can give ranking. If customer is in hurry, executive can send SMS link and customer can give feedback afterwards.

In case of negative feedback, workshop manager will get instant notification. MIS of feedback will be instantly available to workshop manager and company regional manager. In case of negative feedback workshop manager will make follow up with dissatisfied customer and close his/her complain. In short this app is very useful tool to increase customer satisfaction index.

Arron Online is an user-friendly platform which is a bridge between buyers and sellers. In this App, when seller buys product, notification would be sent to nearby dealers who sales that product. If no dealer confirms order, notification would be sent to all dealers of that city who sales that product. Once dealer confirms order, confirmation notification would be sent to buyer. Once dealer delivers product, he will mark it as DELIVERED. Also referral bonus, platform charges, promo code are nicely managed in the App.

MOBILE APPLICATIONS

Parvati Motors is a Hero Moto Corp Dealer. With this App, he can upload all vehicle models and variants along with finance schemes. Dealer can prioritize model display sequence. There is an unique option of finance calculator. Buyer can calculate EMI based on his comforts for down payment, EMI amount he can pay.

For Parvati staff this app is like a virtual showroom. They log into the app and show various models to prospects, show features, colours, technical information and accept payment through payment gateway option. End user can also do the same. Once any booking is done, showroom admin will receive mail. Even there is provision for take signature of client and also finance agreement can also be printed from the App.

Lila Torran is an app specially designed for agriculture products for B2C sales. In this app, registered user can post their products for sale. Along with product image, sale rate, description and product category would be mentioned. Once product is approved, all users of that district will get notification. Interested buyer can directly call from app to seller, send WhatsApp message, share link to friends. Apart from that they can get weather forecasting, news through app.

KEY CUSTOMERS

USA

AJP Network is a very reputed group having multiple Dunkin Donuts & Baskin Robins Stores. We have developed Employee Hiring Tool for them. This web based tool has helped them in tracking and managing job applications. Also all legal documents are available with a single click. Automatic E-Mail also save lot of time of key people.

Any job applicant can apply from Anywhere , Any time from Any device. Application would be available to Store manager as well as HR manager. Once employee is being selected he/she would get user name and password automatically by system. Employee can upload all legal document and those documents would be available to store manager and HR manager. With the help of dash board HR manager can see all open and closed applications any time with in fraction of seconds.
